

As we have seen in the last election, no-excuse absentee voting is a recipe for fraud. We must protect our voting system from those who would cheat and subvert the will of the people. There is no Covid-19 emergency! A huge percentage of the population has gotten some variation of this virus at this point and has scientifically proven, long-lasting, natural immunity. Last I knew CT had at least around 70% vaccination rate and there has been ample time for those who believe this will protect them to get their shot. If they are thus protected by these shots, there is no reason they cannot vote in person. Those who have not gotten shots at this point do not have them because they are unconcerned about Covid, trust their natural immune system, or don't want them for any other reason. But the point is they have chosen this and are comfortable with it. If there is anyone left who does not fit in this category, they can wear N95 masks if they wish and sanitize hands if they are still paranoid about the virus. This point is, between the vaccinated and the intentionally unvaccinated groups, there is no one who needs this bill. Then you can add to that the fact that it is no more than a cold at this point and has the same deadliness as a cold or flu, which do not and never have warranted special voting treatment. This bill serves no constituents except those who wish to commit fraud in our voting systems.

Therefore, anyone who voted for this bill can only be doing so because they support the fraud happening in our elections. There is no emergency. All emergency measures should be ended and there is no reason to allow these fraud ridden voting measures to pass.

If any legislator votes for it, we, the people will know you are in bed with those who have committed great fraud in our country and we will make sure you get removed from office and prosecuted for your crimes against the people of CT.

Vote no! Protect our elections. Without them we have only tyranny.

May God protect America and those who do what is just and right!

Sincerely,  
Lisa Blore
